AUTHOR'S PREFACE.

ONE of the principal points by which the Author has sought to render this work of value, and to distinguish it from other books of the same class and purposes is, that the majority of the designs are of radical originality, and vary from each other not only in part, but in principle. The taste for any particular style quickly becomes cloyed by repetition. Sameness has been avoided as much as possible, giving the copyist the chance of variety in his work, and the opportunity even of forming new styles of his own, from the hints herein furnished.
